

Ansell Cares[®] online courses

Fully accredited by EORNA ACE

EORNA ACE

Following EORNA's launch of the Accreditation Council for Education (ACE), AnsellCares[®] online courses have become the first to receive ACE accreditation.

Part of an educational series on infection control, allergy prevention, barrier protection and nursing procedures, AnsellCares[®] courses perfectly link to the requirements of continued education for healthcare workers around the world.

Easily accessed online, each AnsellCares[®] course content can be downloaded for independent study. Tests are conducted online, with final results and accreditation points delivered on an EORNA ACE certificate.

How does it work?

Learn at your own pace online

AnsellCares® online courses are easily accessed and convenient, allowing you to develop your professional knowledge and earn credits through independent study.

1. Visit EORNA at www.eorna.eu
2. Log on to EORNA Academy (or create a login if you don't have one).
3. Choose the course you want by clicking on the downloadable PDF.
4. When you are ready, return to the site and click on "Test" for this course.
5. After completion online, your test will be automatically evaluated. Final results and accreditation points will be delivered on an EORNA ACE certificate.

My Courses		PDF	Test
Double Gloving	Short description of what you can learn from the Double Gloving PDF		
Understanding the Hazards of Glove Powder	Glove powders have been determined to play a causative role in latex allergies, occupational asthma, surgical adhesions, and dermatitis as well as other conditions		
An analysis of gloving material	This course will help you sort out the pros and cons of different glove materials, the pertinent characteristics of latex, nitrile, neoprene, polyisoprene, and vinyl gloves		
Understanding the relationship between surgical gloves and electrosurgery.	This self-study guide will describe basic principles of electrosurgery related to surgical gloves and offer advice to prevent intraoperative electrical shock or burn to surgical personnel during electrosurgery.
